strategies.

Full Stack Web Developer — *Urbanwand, Gurugram*

SEPTEMBER 2015 - AUGUST 2017

- Member of the founding team and led the core product development.
- Responsible for Web apps, database management, deployments, and APIs as well as UI.
- Delivered performance-driven and user-centric websites that met all business requirements.

EDUCATION

Kurukshetra University, Kurukshetra — *B. Tech. (CSE)*

May 2011 - July 2015

PROJECTS

aLex-ModCon — A.P. Moller *Maersk*

Working on the Contract Management system and micro frontend integrations. We are automating the whole manual contracting workflow with advanced i- house CMS developed to manage clauses, assets, templates etc.

Leading integrations with other services and respective teams. Also, worked on revamping and migrating the whole application to newer and better platforms.

AirAsia Rewards — *Airasia Technologies*

Working on the Airasia loyalty rewards module embedded in the Airasia superapp. This module provides an interface for existing customers to redeem loyalty points, buy vouchers, gift cards, etc.

Leading the hybrid app module development and besides development, I also manage the interaction and integration with the other services and respective teams.

BigXchange — *Airasia Technologies*

Working on customer-facing mobile-first web application developed with React.js. This application provides an interface to the end users so that they can convert their loyalty points from other platforms to AirAsia Big Points and vice versa.

Leading the front-end development of the project and besides development, I also manage the interaction and integration with the other services.

StoreHippo — *Hippo Innovations*

Led the backend development for the e-commerce platform.
Besides the development of new features, I was also responsible for managing the sprints, task allotments, requirement analysis, etc.
https://www.storehippo.com/

CERTIFICATIONS:

Microsoft : HTML5, Microsoft Certified Professionals

IBM: Rational Application Development, Worklight

10gen: MongoDB Administrator, MongoDB Database Designer

Linux Foundation: Introduction to Linux

LANGUAGES

English, Hindi

Shipkaro — *Hippo Innovations*

Led the backend development for the logistics platform built on top of
storehippo.
Shipkaro is a logistics aggregator platform providing advanced features
such as tracking, scheduling, delivery reports, invoice reconciliations, 3rd
Party logistics integrations such as Bluedart, USPS, DHL, Delhivery, etc.
I was leading the development and maintenance of the platform.
Daily tasks included bug fixes, logistics partner integrations, automation,
etc.
https://www.shipkaro.com/

Typito — *Typito Technologies*

Worked as full stack javascript developer and was responsible for
customer-facing interface design and enhancements.
Day-to-day tasks involved platform enhancements and
customer-reported bug fixes.
